WORK EXPERIENCE

Campus Saint-Jean – University of Alberta   Summer 2010 and 2011
Technical Support & Web Development
- Contributed to web development projects with HTML, CSS, sprites and backgrounds.
- Developed a minimal portfolio website for a tenured professor.
- Provided technical support and rudimentary software training to staff onsite.
- Developed a variety of simple visualizations with Adobe Photoshop and Adobe Illustrator to fulfill the needs of professors and event coordinators.
- Assisted in the maintenance of the Campus Saint-Jean website.

Terry Wainman Corporation   2018-2020
Technical Support & Junior Information Systems Manager
- Researched, installed and maintained third-party software solutions that proved to be a good fit within the company's sociotechnical system.
- Improved inefficient and ineffective business processes by introducing automation that minimized time-consuming repetitive digital tasks.
- Streamlined redundant and costly dependent processes.
- Managed a small relational customer database and developed T-SQL procedures to mitigate the insertion of bad data.
- Analyzed data and presented reports to executives on business goals and trends.
